

Recording the AA (Alcatel Omnipcxoffice)

- Press right arrow on navigator key ►
- Press the key under operat
- Enter password 19541954
- Press the key under Expert
- Press right arrow on navigator key ►
- Press the key under VMU
- Press the key under AutoAtt
- Press the key under Day or Night (depending of course on which menu you want to rerecord)
- The display then shows greeting – this is an introduction only, callers cannot push an option in this area so it is better if it is left blank (we can import a brief silence into this area if you have accidentally recorded anything in here)
- Press the key under Next so that Main Menu displays on your screen
- Follow the prompts on the screen to record the AA greeting and menu options

- If there are any submenus off the main menu, once you have recorded the main menu press next go into the submenus. Keep pressing next until you find the submenu you want to record.
